

Specialised System Components for Flour Milling Plants

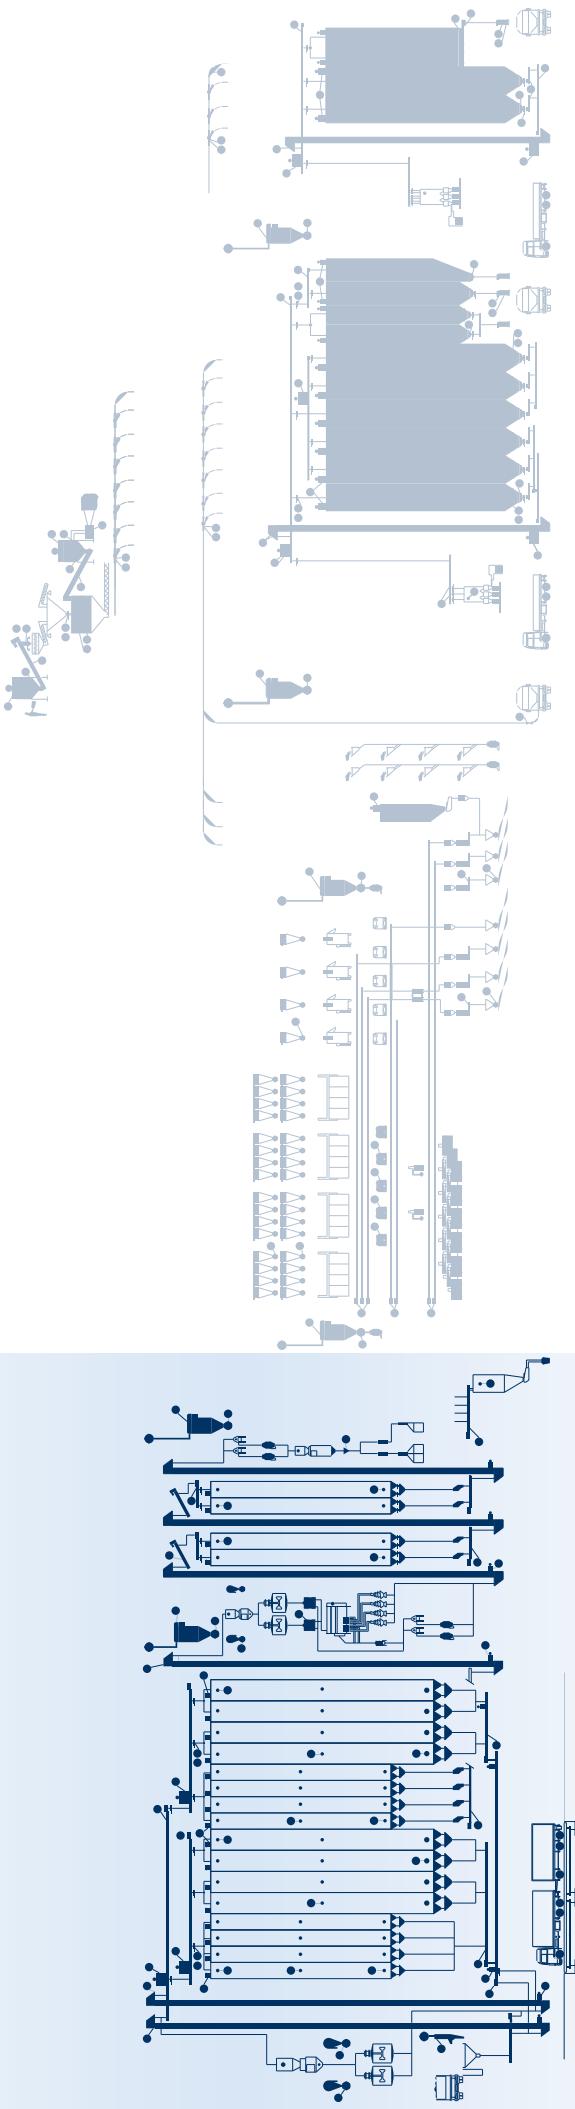

Flour Milling

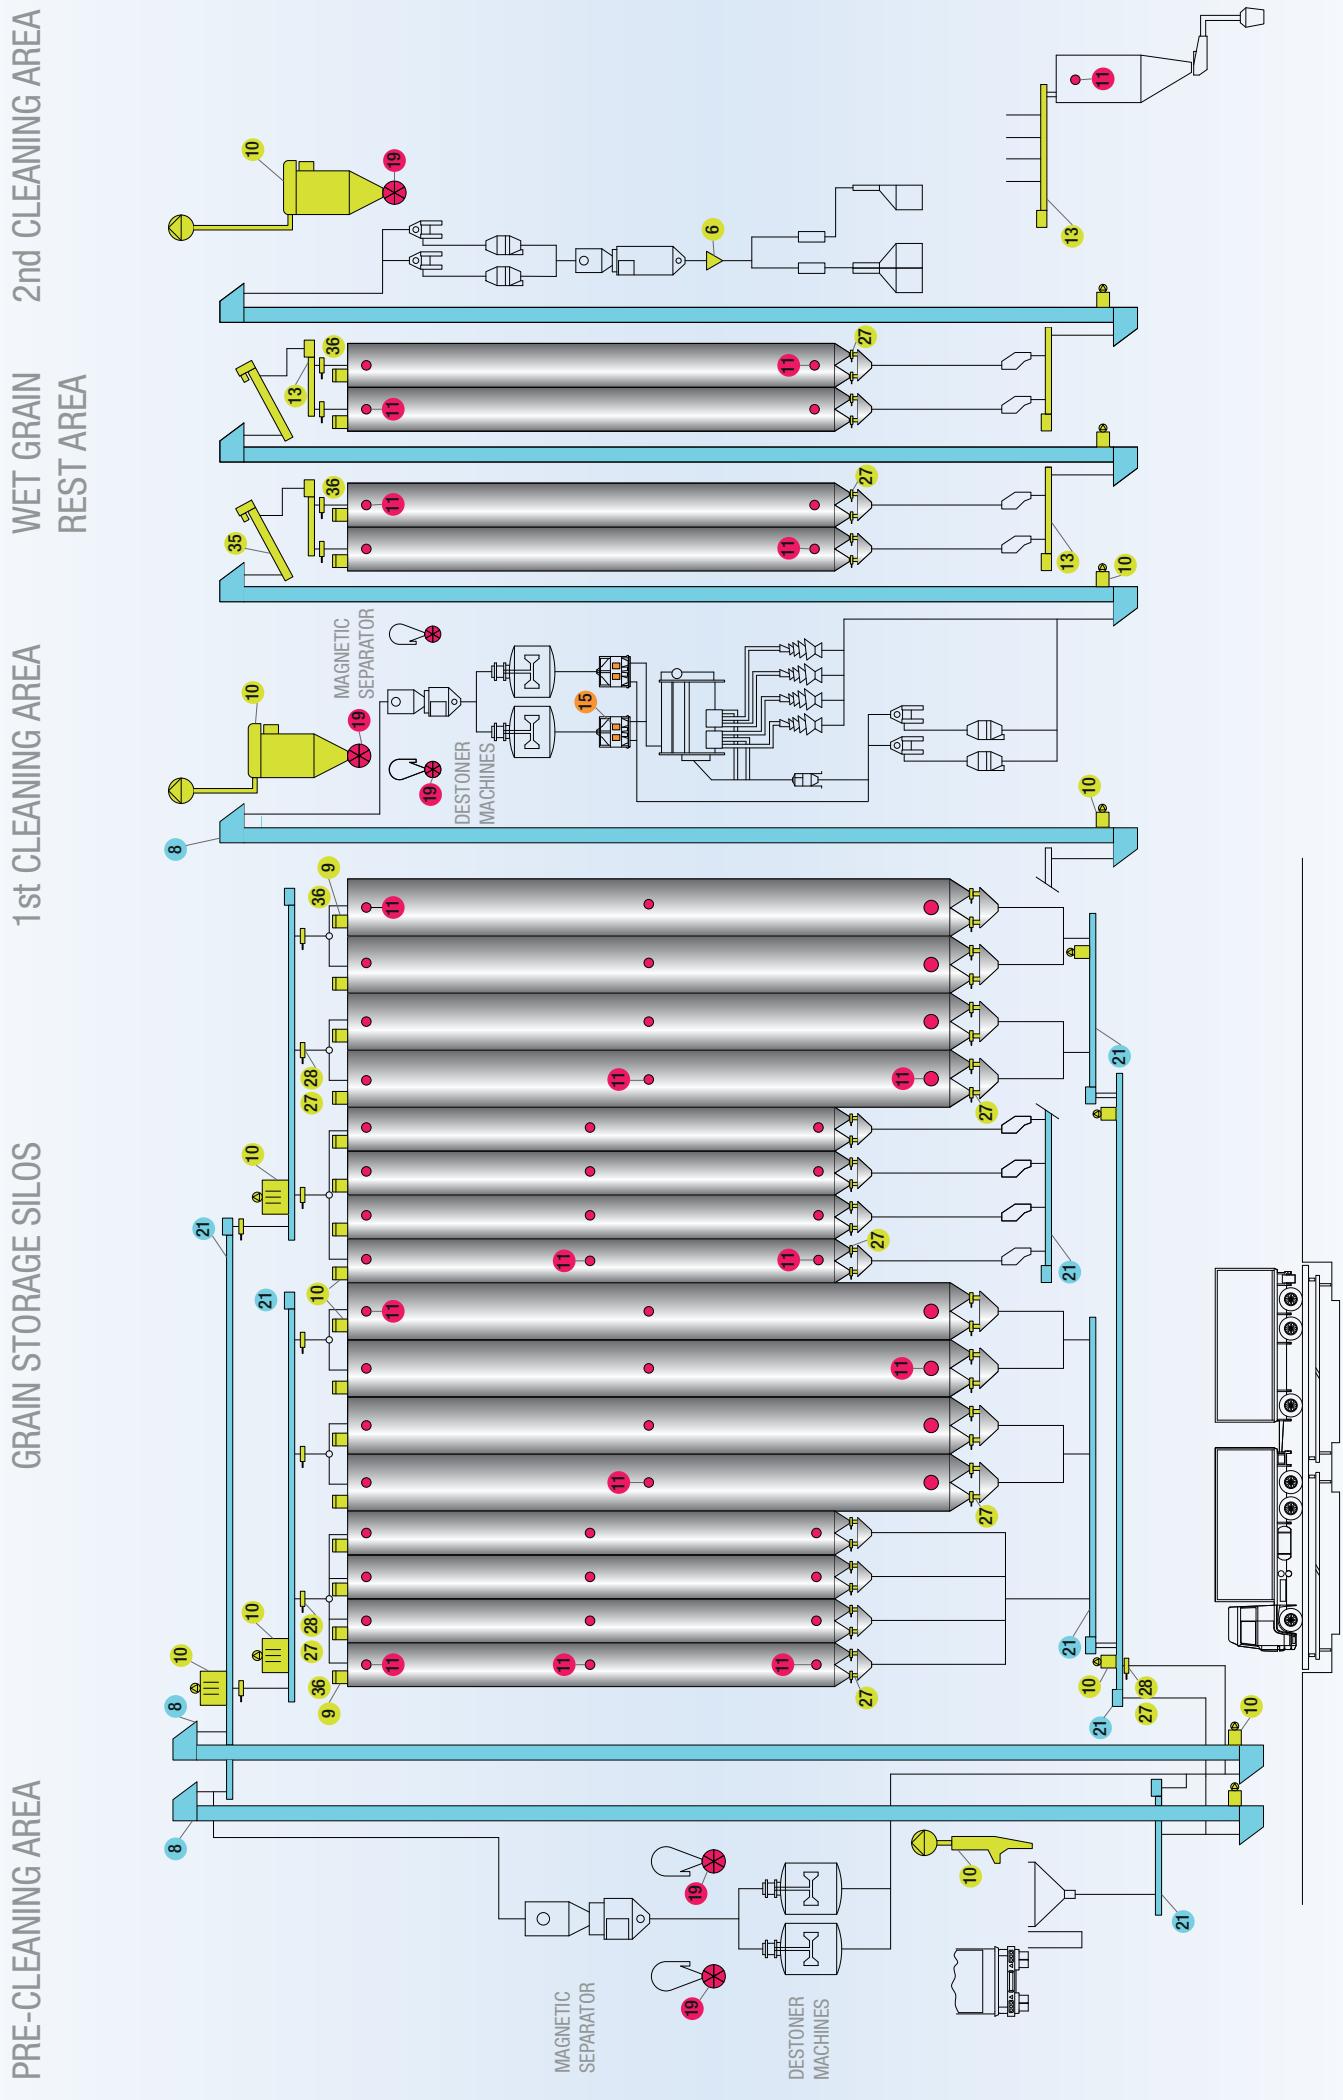

Flour Milling

RAW MATERIAL STORAGE

Cereals on arrival at the plant are collected in big silos or cells.
Different steps of cleaning and conditioning ensure the cereals will
be ready for the milling process with the right moisture content.

WAMGROUP® offers specialised system components tailored to the specific requirements of project engineers of flour milling plants.
By selecting this specialised equipment, system designers have the assurance they will combine top quality and performance with the highest possible operating efficiency.

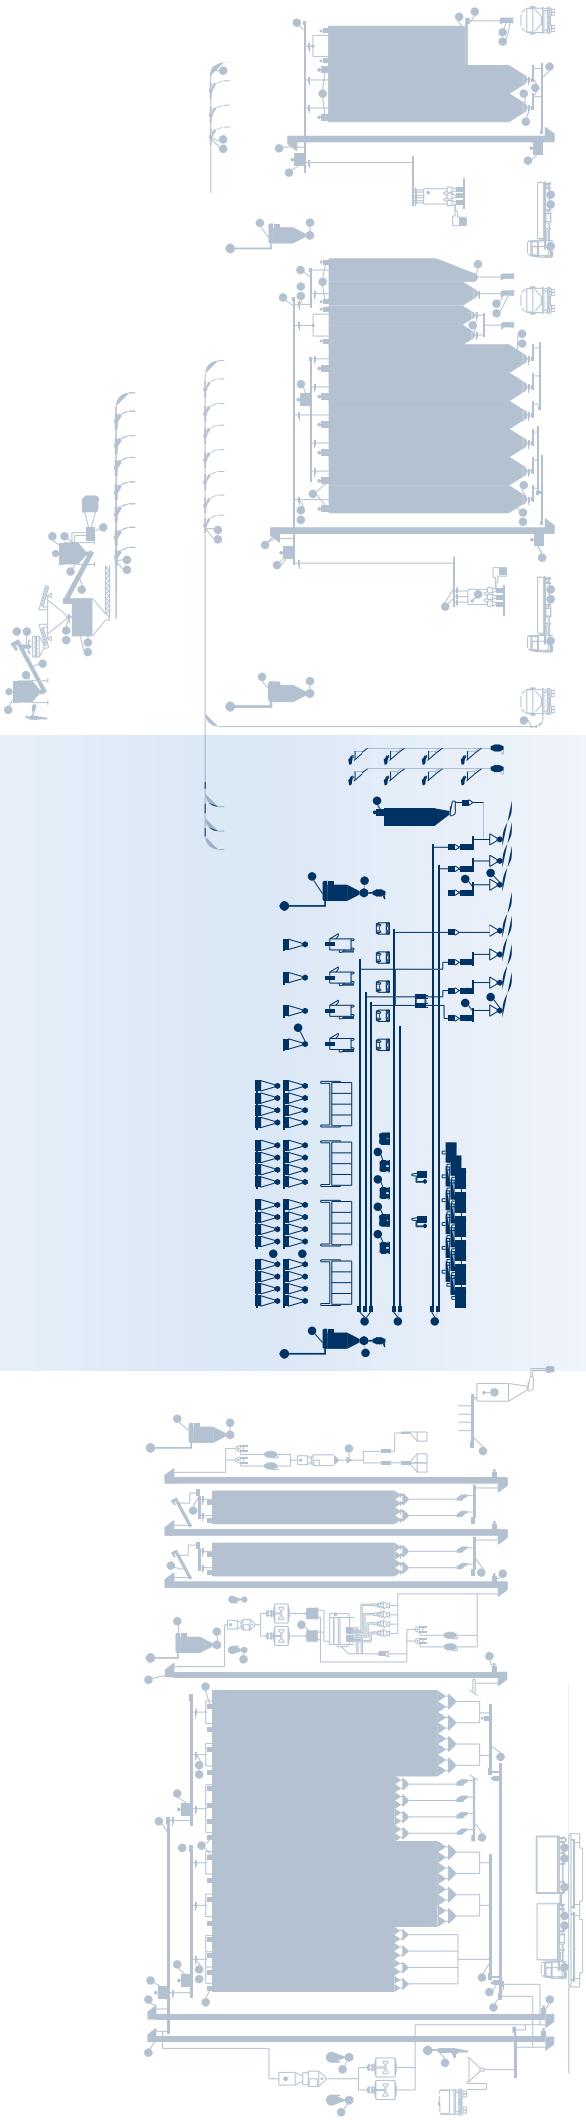

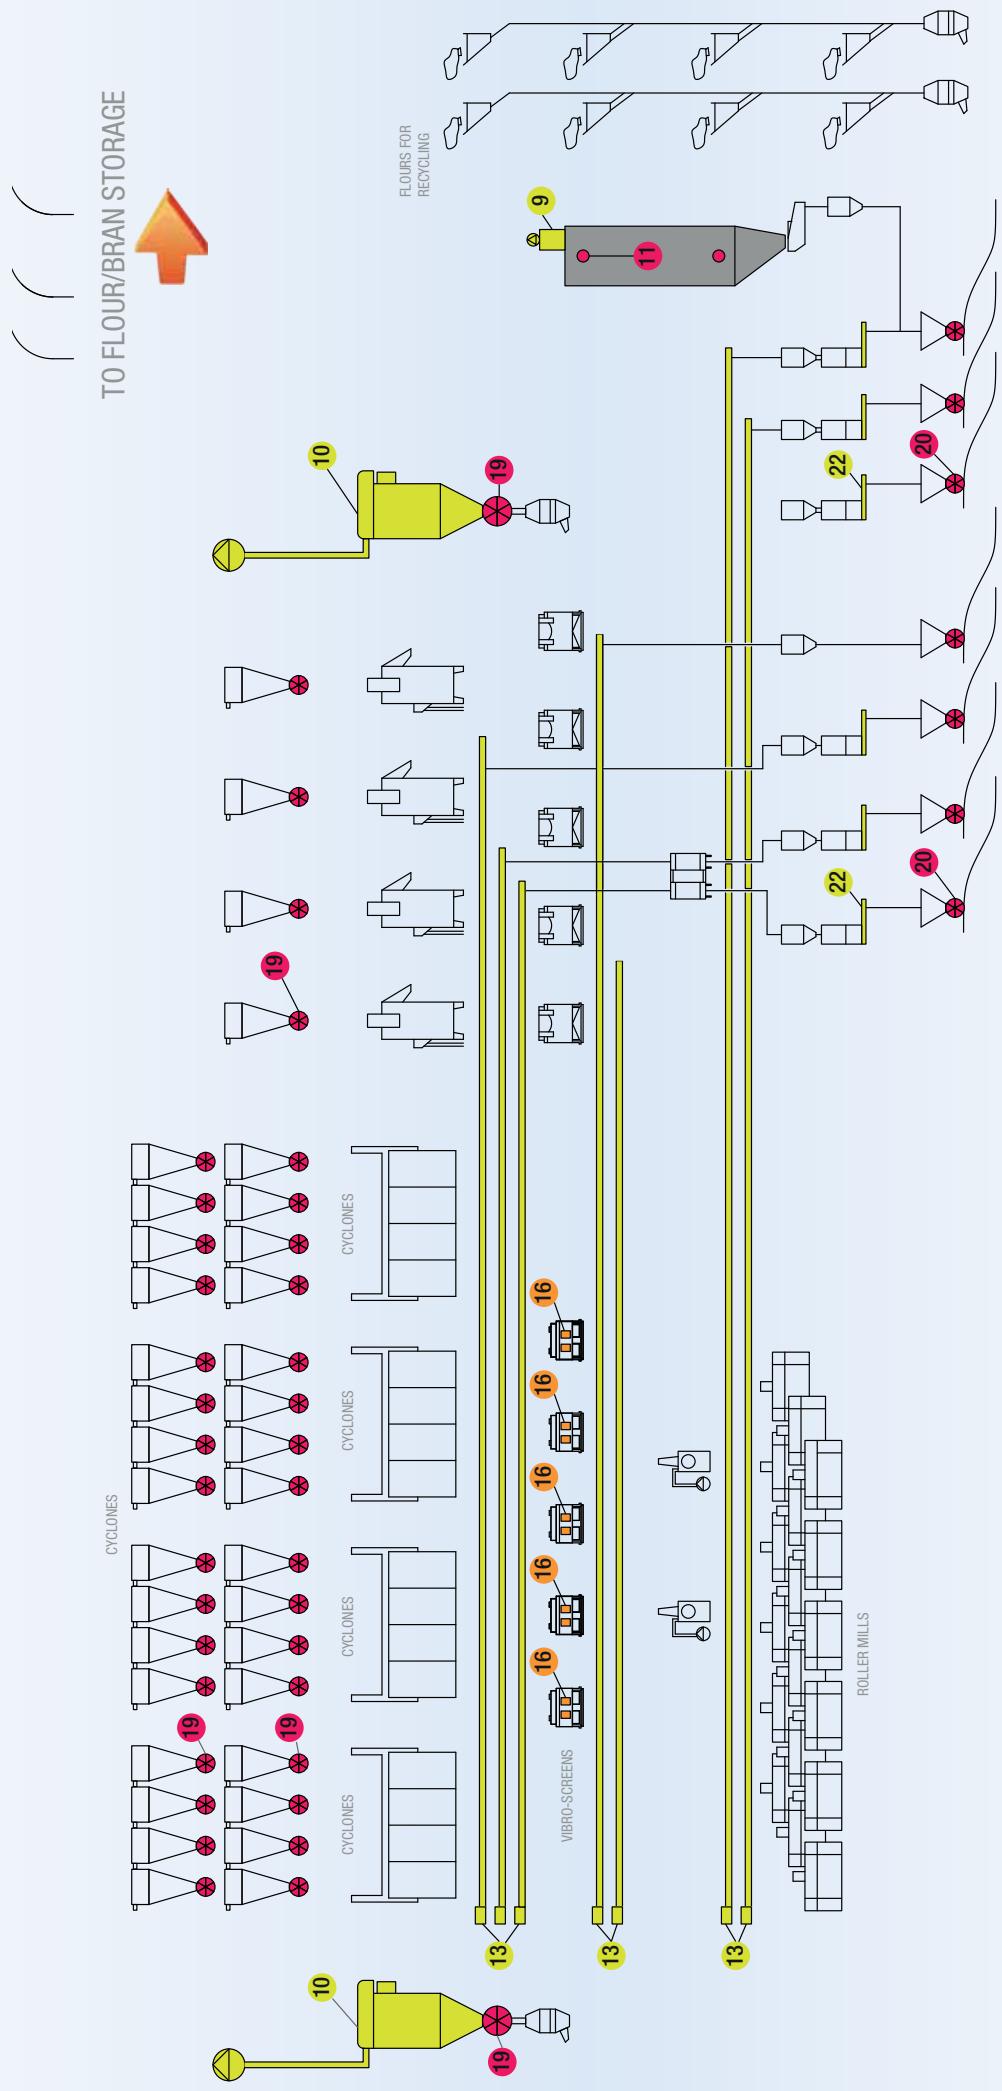

MILLING & SCREENING

This is the core of the plant: Cereals are milled to extract the flour from the husk. Several mills and sieves produce flours in different particle size and purity.

WAMGROUP® offers specialised system components tailored to the specific requirements of project engineers of flour milling plants. By selecting this specialised equipment, system designers have the assurance they will combine top quality and performance with the highest possible operating efficiency.

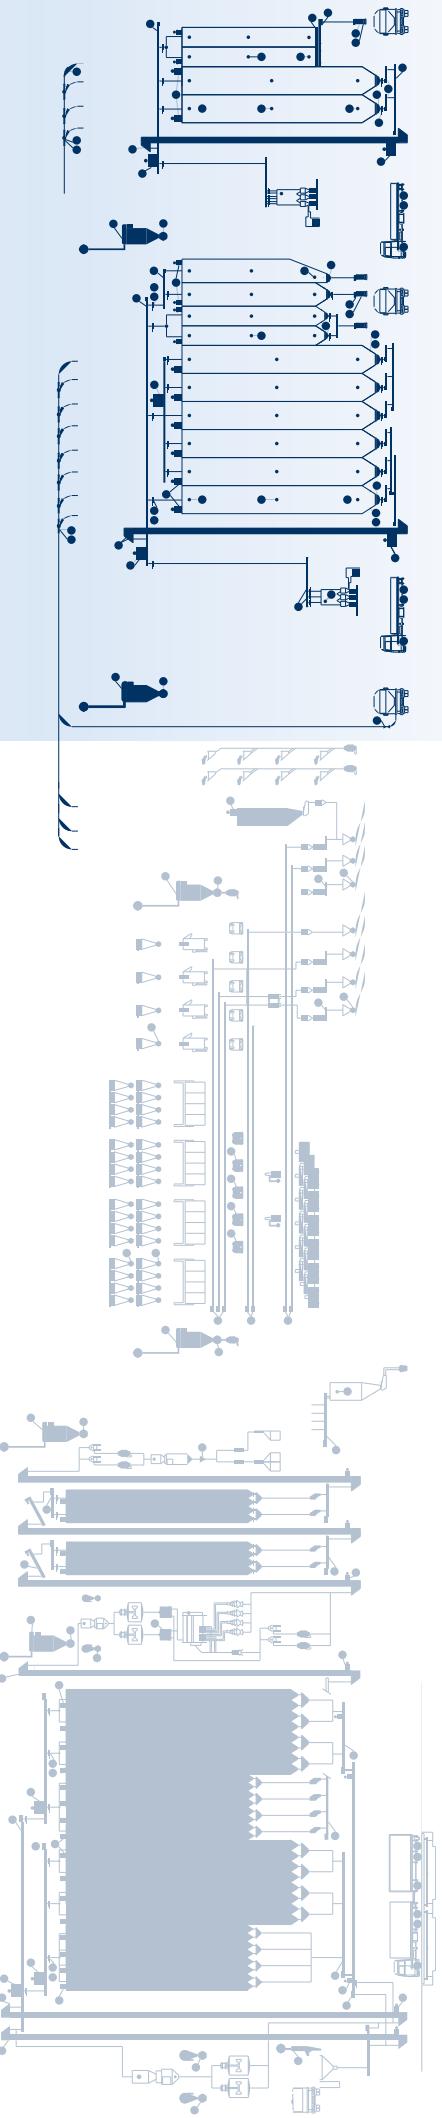

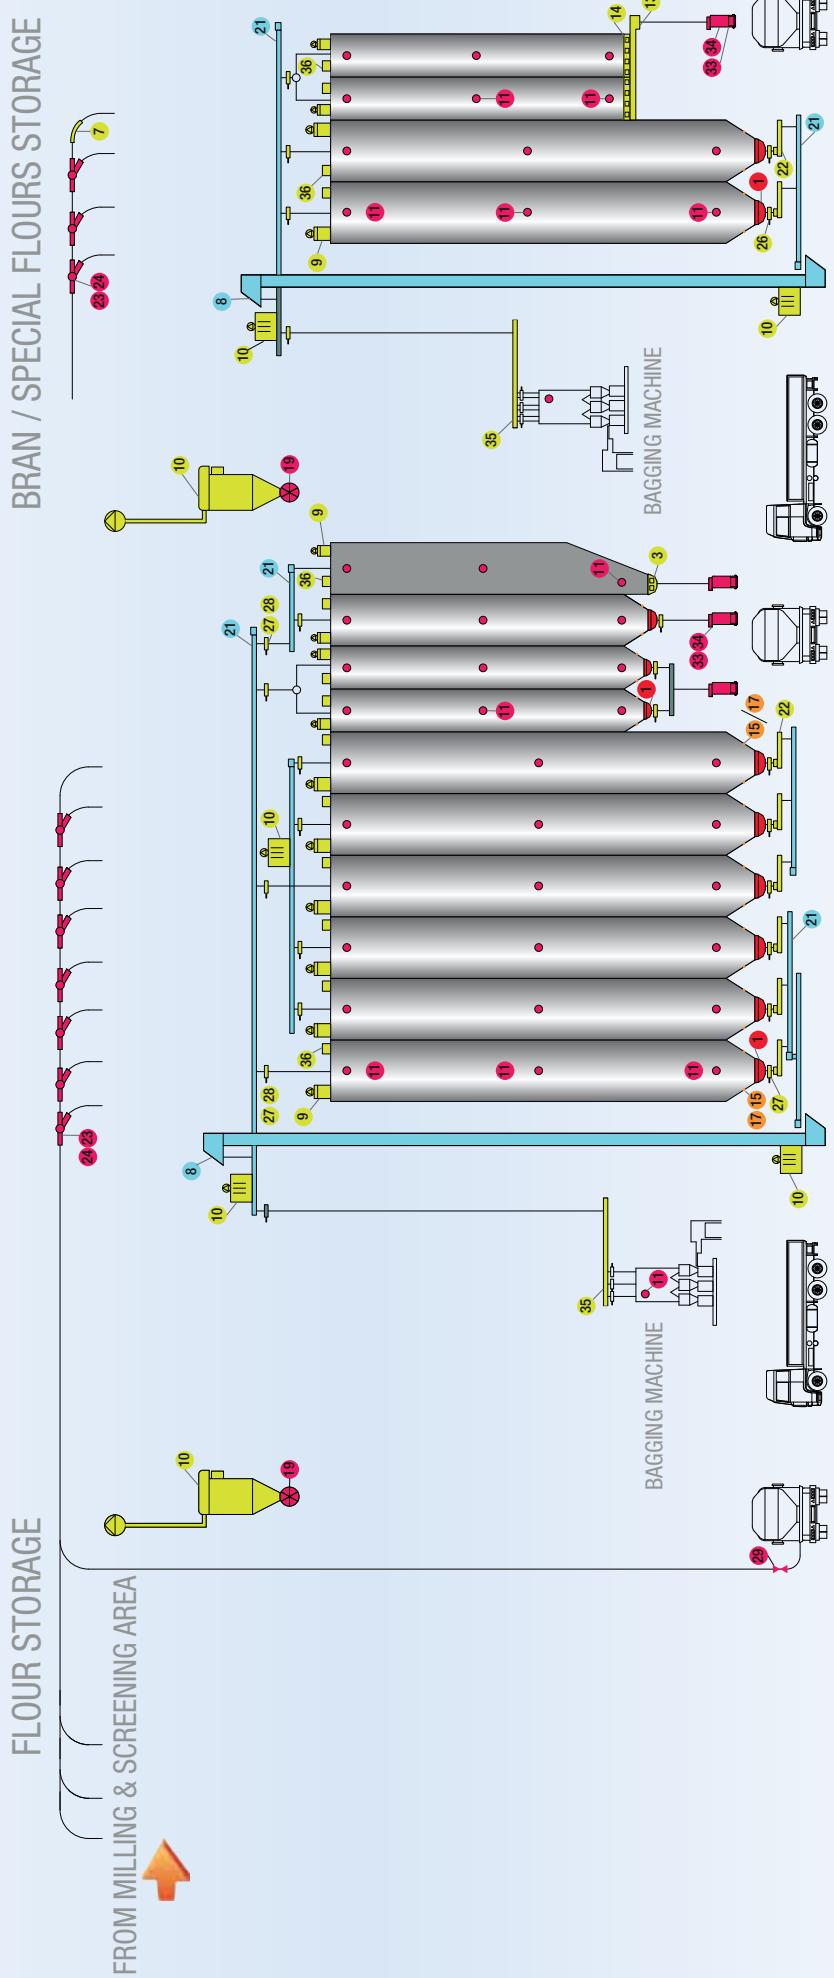

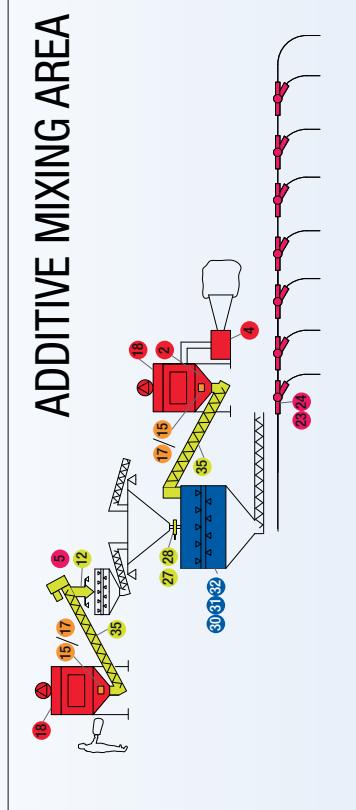

FLOUR/BRAN STORAGE

WAMGROUP® offers specialised system components tailored to the specific requirements of project engineers of flour milling plants. By selecting this specialised equipment, system designers have the assurance they will combine top quality and performance with the highest possible operating efficiency.

Classified milled flours and by-products are conveyed in this area to be stored in silos or cells to be then distributed to the market. In that area flours are discharged from silos to be packed into bags or loaded into tankers for bulk delivery.

To obtain products with specific properties, flours can be also mixed with other ingredients (additives, vitamins,...) before being packed or stored again.

①	Bin Activators BA-210 BAEF-X-210 <i>Mass flow discharge</i>		⑩	WAMAIR® Dust Collectors FP-210 / FPX-210 <i>Maintenance-friendly</i>	
②	BINSWEEP® Rotary Dischargers BSN <i>Height-saving discharge</i>		⑪	Rotary Level Indicators ITI <i>Easy to install</i>	
③	Tapered Twin Shaft Screw Feeders BU <i>Mass flow discharging & feeding</i>		⑫	Micro-Batch Feeders MBF-210 <i>Process reliability</i>	
④	Waste Bag Compactors COM <i>Clean work environment & operator safety</i>		⑬	Tough Screw Conveyors MSC <i>Easy access for cleaning</i>	
⑤	Loss-In-Weight Screw Feeders DCC <i>Highly reliable and easy to clean</i>		⑭	Live Bin Bottoms MU <i>Ideal for discharging bran or middlings</i>	
⑥	Divertor Valves DVA <i>Dustproof</i>		⑮	External Electric Vibrators MVE <i>ATEX zone 22-compliant</i>	
⑦	EXTRABEND® & EXTRACURVE® Pipe Elbows <i>Abrasion-resistant lightweight design</i>		⑯	External Pneumatic Vibrators OT-Type <i>Specialised version</i>	
⑧	Bucket Elevators EF-EC <i>Maximum work safety ATEX zone 22-compliant</i>		⑰	MARTSHOCK Pneumatic Hammers PS <i>High impact force</i>	
⑨	WAMFLO® Dust Collectors FN-210 and FNX-210 <i>Compliant with ATEX and latest health & safety standards</i>		⑲	Manual Bag Openers RSM-210 - RSMX-210 <i>Minimum-residue design</i>	

⑩	Drop-Through Rotary Valves RV/RVR <i>Versatile in all applications</i>		⑳	Slide Valves VL <i>No seal adjustment required</i>	
㉑	Blow-Through Rotary Valves RVS <i>Easy access to internal parts</i>		㉚	Pinch Valves VM <i>Easy sleeve replacement</i>	
㉒	Chain Conveyors TCG <i>Sturdy design</i>		㉛	Batch-Type Single Shaft Mixers with Bomb Bay Discharge WBH <i>Short mixing and discharge time</i>	
㉓	Tapered Single-Shaft Screw Feeders UM <i>Minimum-residue design</i>		㉕	Continuous Single Shaft Mixers WAH <i>High productivity</i>	
㉔	Divertor Valves VAD <i>Easy to install, compact design</i>		㉖	Ribbon Blenders WBN <i>Gentle blending</i>	
㉕	Divertor Valves VAR <i>Contamination-free</i>		㉗	BELLOJET® Tanker Loading Bellows ZA <i>Built-in low-profile dust collector</i>	
㉖	Vibrating Bin Aerators VB <i>For all powdery materials</i>		㉘	Tanker Loading Bellows ZG <i>No waste material during loading</i>	
㉗	Butterfly Valves VFS <i>Maintainence-friendly: limited number of components</i>		㉙	Slide Valves VG <i>High flow rates</i>	
㉘	Bucket Elevators FF-EC <i>Maximum work safety ATEX zone 22-compliant</i>		㉚	VCP Spring-Loaded Pressure Relief Valves <i>Maximum work safety: ATEX zone 21-certified</i>	

㉙	Slide Valves VL <i>No seal adjustment required</i>		㉚	Pinch Valves VM <i>Easy sleeve replacement</i>	
㉛	Batch-Type Single Shaft Mixers with Bomb Bay Discharge WBH <i>Short mixing and discharge time</i>		㉜	Continuous Single Shaft Mixers WAH <i>High productivity</i>	
㉝	Divertor Valves VAR <i>Contamination-free</i>		㉞	Tubular Trough Screw Conveyors & Feeders CA0 <i>Minimum-residue design</i>	
㉞	Vibrating Bin Aerators VB <i>For all powdery materials</i>		㉟	VCP Spring-Loaded Pressure Relief Valves <i>Maximum work safety: ATEX zone 21-certified</i>	
㉟	Tanker Loading Bellows ZG <i>No waste material during loading</i>		㉟	Butterfly Valves VFS <i>High flow rates</i>
